MANUFACTURING COMPANY

Body Service Dept.

12141 CHARLEVOIX AVENUE • DETROIT, MICHIGAN

THERE'S magic in the Budd name. Mere mention of it is sufficient to arouse visions of achievement in a highly competitive and highly diversified field. The Budd name stands for creative effort. It gave birth to the all-steel automobile body, pioneered its development. It introduced the stainless steel train, saw it revolutionize railroading. Budd patents have been many. Old methods have given way to new under Budd leadership. A mighty industry progresses along the clear-cut trail emblazoned by Budd . . . so too has the Service Department of the Edward G. Budd Manufacturing Company pioneered. It was first to give you factory-to-shop service on paints, lacquer, tools and equipment. It introduced the Door Repair Panel as a low-cost rapid replacement unit. It has always lead in the maintenance of low prices, enabling you to effect unusual economies and share them with your customers.

W. Stansberry

Service Manager
Edw. G. Budd Mfg. Co.

EDW. G. BUDD MFG. CO.

Gives You . . . .

- **REPUTATION** . . . Back of every product listed in this catalogue is the accumulated experience of Budd's quarter of a century in the development and manufacture of automobile bodies and parts.

The BUDD PRIDE label means that the product bearing it has no superior.

The BUDD UTILITY label stands for dependability in a product designed to meet the needs of a price buyer.

- **QUALITY** . . . You can depend upon Budd! The skilled technicians, expert craftsmen and scientific laboratory tests which contribute to the development of Budd products know but one law: DEPENDABILITY.

- **SERVICE** . . . All orders are filled and on the way to you within 24 hours of their receipt. Stocks on hand are ALWAYS complete. When you order from Budd you can be sure that your order will be assembled immediately.

- **SAVING** . . . Because the majority of the products listed herein are used daily in the vast Budd plants, purchases and production of these items are necessarily on a tremendous scale. The savings effected are passed directly on to you.

Remember **BUDD PAYS THE FREIGHT ON ORDERS OF $15 OR MORE**

PAINTS · LACQUERS

BUDD
MFG. CO.

THE STORY OF PAINT . . . .

NATURE is the original artist. She created her own paints, applied them with a lavish hand. Her technique has always been perfect, her touch sure. No matter how profuse the coloring, no matter how myriad the tints, no matter how vivid the shading—there has never been anything short of perfection in the harmony. Clashing colors are unknown in the natural world.

The ancient man borrowed his colors directly from Nature. His white pigment was the whitish clay from the island of Melas; his red came from the red soil of Cappadocia; Attic silver mines yielded yellow; black came from charred plant life; the copper mines provided his green; imperial purple was found in Tyre. Other colors were added as he discovered ways of extracting them from Nature.

While the use of paints has been known since earliest times, it is only comparatively recently that their full possibilities as a protective covering were realized. Before that, paint was purely ornamental. Its use was simply decorative. It provided color, eliminated drabness. The artist and painter were synonymous. He mixed his own pigments, dis covered his own new colors, left a priceless heritage in the frescoes and paintings that survived him.

Gradually the commercial possibilities of paint came to be realized. The use of paint as a protective covering against deterioration due to the elements and time opened up a vast new field. New methods of manufacturing paints were discovered. Ready-mixed paints came into being. Enamels, commercial lacquers and varnishes were added and the paint industry as we know it today reached a flourishing stage.

LACQUER THINNER! NO. 100

As Used on Budd's Own Production Lines!

•

It actually compares with thinners selling up to $1.25 a gallon! Budd's Factory-to-Shop direct selling method makes possible our remarkably low price! Exhaustive tests in Budd's own laboratories and rigid trials in actual service give unquestioned proof of its superiority! Guaranteed to be absolutely free from benzole!

Purest Ingredients

An excellent all-around product that works perfectly with any nitro-cellulose lacquer. Mild in action. Particularly desirable as a thinner for lacquer base undercoats.

Well-Balanced

Works perfectly as a final coat over lacquer to flow in the sandpaper scratches.

The Right Start Means a Good Finish!

Synthetic

ENAMEL THINNER No. 3010

It is necessary to use a synthetic thinner to assure a uniform, trouble-free synthetic job. This is true no matter who manufactures the material you use. BUDD SYNTHETIC THINNER reduces Orange-Peel and dries quickly. Order a drum today. Keep a generous supply always on hand.

BUDD PRIDE

'WAX-SOL'

CLEANER AND WAX REMOVER

Make the repaint job doubly profitable by cutting the time in half . . . use Wax-Sol—instant solvent of all wax, tar and road film—and dispense with sanding and the scratches that result. The modern way of preparing the repaint job for the application of the new coat (lacquer, synthetic or Bud-Kote) starts with WAX-SOL. Simply wash the surface with a rag saturated with WAX-SOL to remove all dirt and grease. Wipe off with a clean rag. Sand-paper rust-spots only. Then apply primer-surfacer to exposed metal parts and you are ready for the final coat.

ORDER BY No. 711

IN GALLON CANS **$1.75 gal.**

Reduces Orange Peel

THINNER RETARDER

No. 110

Eliminates Blushing

Lacquer sanding operation can practically be eliminated by the proper use of this Thinner Retarder. Add one pint of Retarder to one gallon of thinner for lacquers sprayed in humid weather. Complete directions for its use with each can.

5-GALLON CANS **$1.35 gal.**

1-GALLON CANS **$1.45 gal.**

STRIPING THINNER

No. 220

Recommended for use in reducing striping lacquers. Slower drying than regular thinner which is necessary for brush work. The well-equipped Paint Shop will always have a supply on hand.

PINT CANS **40c pt.**

Color Matching Service

Budd will match any color synthetic at no extra cost. The price will be the same as the closest similar shade. Just send a sample; we'll do the rest!

Indispensable is the one word that fitly describes Synthetic Black No. 50! It's absolutely necessary in even the smallest refinishing shop! It has no equal for preparing used cars for re-sale! It makes an undercoat unnecessary! It requires no polishing! For a fast job, a thorough job, a satisfactory job at low cost . . . use Budd's Synthetic Black No. 50.

135	Yellow—Medium Chrome	2.95	.85

With five millions of new cars scheduled to roll off the assembly lines during 1937, it is conceivable that almost that many previous models will join the ranks of "used cars" in trade-in deals! What a golden opportunity for the Body Repairman who is on his toes! Most of these cars must be re-finished or touched-up before they are offered for sale. If your shop is equipped to give 24-hour service on "Tru-Match" re-finishing, you can share in the tremendous profits. Depend on Budd in 1937 to help you!

Stock Up and Profit!

New Polychromatic Synthetics

They're lustrous colors that will make a "used-car" think it just rolled off an assembly line. All are new, standard for 1937 and preceding years. They mean profitable business for you!

$2.45 gal.	$2.55 gal.

No. 515
POLISHING
BLACK LACQUER

Reduces 1½ Parts Thinner to 1 Part Lacquer

- **Jet Black**
- **Polishes Easily**
- **Excellent Covering Qualities**
- **Dries Quickly**
- **Very Durable**

This lacquer is unexcelled for complete repaint jobs! And because it dries to a good natural gloss and thus reduces polishing to a minimum . . . it is much in demand for use on dust shields, aprons, fenders and other places where polishing is difficult. Take advantage of these remarkably low Budd prices! Order today!

The Best of Their Kind Manufactured

HI-GLOSS BLACK LACQUER

No. 4000

Dries Quickly • Matches Baked Enamel • Maximum Gloss

Budd's Hi-Gloss Black Lacquer is the perfect lacquer for quick touch-up repair work because it blends into the enamel and does not require polishing. It is quickly applied and achieves maximum gloss immediately . . . yet is far more durable than any similar product on the market today. It is not affected by humidity.

Reduces 3 to 1

The Finest of Its Type That Money Can Buy! . . . Budd Recommends It Unreservedly!

BLACK POLISHING LACQUER

No. 5000

(Add 2 Parts of Thinner, Have 3 of Material)

A polishing black of the highest quality . . . recommended for all fine work! Its covering qualities have no equal. The resultant film is smooth without being brittle and is designed to withstand weather. It does not check. Budd Black Polishing Lacquer No. 5000 polishes easily to a beautiful high-lighted lustre . . . retaining its freshness and remaining black indefinitely.

No. 5000 is the result of painstaking years of research by Budd's laboratory scientists. It is exceptional quality at a reasonable price!

PYROXYLIN UNDERCOATS

Superb Values! Amazing Savings!

Years of patient research in the Budd laboratories have been rewarded in achieving these "Budd Utility" surfacers . . . the best obtainable at the price! They will not crack, check or peel off. They fill well, dry quickly and sand freely to a smooth, uniform surface that is non-absorbent and capable of holding out succeeding coats of lacquer perfectly.

2½ for 1
ADD 1½ PARTS OF THINNER—HAVE 2½ OF MATERIAL

DUPLEX PRIMER SURFACER

No. 11037-A

Reduces 1½ parts thinner to 1 part Primer Surfacer

This product was created particularly for touch-up work. No repair or collision shop can afford to be without it!

Because this Duplex Primer Surfacer combines the essential features both of a primer and surfacer, it saves time and money. It dries instantly, sands easily, and holds out lacquer coats perfectly.

5-GAL. CANS **$2.45 gal.**

1-GAL. CANS **$2.55 gal.**

PYROXYLIN SURFACER

No. 11018-A

Reduces 1½ parts thinner to 1 part Surfacer

It is light gray in color . . . and therefore is particularly serviceable when used under light colors.

Pyroxylin Surfacer is a quick-drying product with excellent filling qualities. It sands easily to a smooth, non-porous film that effectively holds out succeeding coats of lacquer. Little sanding is required because of its fine grind.

5-GAL. CANS **$2.45 gal.**

1-GAL. CANS **$2.55 gal.**

Remember **BUDD PAYS THE FREIGHT ON ORDERS OF $15 OR MORE**

. . . and PRIMER SURFACERS

The Best that Money Can Buy!

The Budd Way is one of proven economy; the use of "Budd Pride" products in re-finishing work makes for a faster, more profitable and more satisfactory job. These Primer Surfacers have toughness, elasticity and real bonding properties. They fill perfectly, dry fast, sand easily and feather-edge for patch work. Keep a supply always on hand!

3 for 1 — ADD 2 PARTS OF THINNER—HAVE 3 OF MATERIAL

PYROXYLIN SURFACER

No. 5050

Very Finely Ground! Little Sanding Needed!

Reduces 2 parts thinner to 1 part Surfacer

The Budd laboratories experimented for years with pyroxylin surfacers before achieving the quality desired for this No. 5050. It fills exceptionally well . . . and, because it is non-porous, no soaking in of other color coats will be experienced. It is possible to spray double-header coats within 15 minutes of each other.

5-GAL. CANS **$3.10 gal.**

1-GAL. CANS **$3.25 gal.**

DUPLEX PRIMER SURFACER

No. 4040

Time Tested and of Proven Quality!

Reduces 2 parts thinner to 1 part Primer Surfacer

To claim this product is "the best that money can buy" would be an idle boast were it not for the fact that the best body shops in the country have used it for many years to the exclusion of all other surfacers! It is heavily pigmented for good filling, yet adheres perfectly to clean, bare metal. Non-porous. Sprays full double-header coats. Particularly adapted to patch-work.

5-GAL. CANS **$3.10 gal.**

1-GAL. CANS **$3.25 gal.**

ENAMEL LACQUER

THE BUDD laboratories perfected this combination synthetic lacquer as the ideal finish for touching up baked enamel. It possesses the fast-drying qualities of lacquer . . . and the enduring high lustre of synthetic enamel. Bud-Kote does not require polishing . . . will not show edges when used for spotting enamel. It has all the economy of a synthetic because it reduces 150% with lacquer thinner for spraying.

BLACK No. 1700

BUD-KOTE can be used to patch a fender, door, or any part of the body in the same manner as a lacquer would be used. The use of BUD-KOTE makes it unnecessary to spray in the entire panel. It is easy to apply, enduring, blends readily with either lacquer or enamel. BUD-KOTE is the ideal paint product: it fills, flows, levels, shines, dries, rubs, polishes and wears! It is unsurpassed, too, for complete re-finishing.

SYNTHETIC PRIMER SURFACER

BUDD PRIDE

No. 11050-A

Here is a product that eliminates the necessity of removing all the old finish to obtain a perfect refinishing job—even though the old finish has checked badly! Budd Synthetic Primer Surfacer completely fills all the minute hair lines and cracks; it builds up a perfect foundation so that subsequent coats will show absolutely no suction. This surface has adhesion and toughness; yet it sands very easily to a high glaze that brings out the fullness of additional coats.

The Perfect Undercoat!

In Two Popular-Sized Containers—Ready for Spraying

5-GAL. CANS **$1.85 gal.** 1-GAL. CANS **$1.95 gal.**

Ready for use. One, two or three coats can be applied 5 to 10 minutes apart. Dry sands easily in one to two hours.

PYROXYLIN SPOT PUTTY

No. 2000

This high-grade product is unexcelled for spotting over Pyroxylin Primer or Pyroxylin Surfacer; will not shrink, and air-dries almost instantly so that succeeding coats can be applied in a few minutes.

½-GAL. CANS **$1.35 can** 1-GAL. CANS **$2.50 can**

1-QT. CANS **75¢**

DYE-SPRA

—Use It to Restore the Beauty of Automobile Upholstery!

To renovate and re-dye the mohair upholstery of used cars inexpensively, all you need is a power spray gun and the Dye-Spra Process. Highest used car values will be assured because of their fresh, bright and newly-upholstered appearance! The Process consists of a PRIMER (Cleaner) and a DYE. The Primer cleans the mohair and prepares it for the Dye which is easy to apply (and a man does not have to be experienced; no masking is necessary—neither primer nor dye adheres to glass or mouldings!)

Use Dye-Spray and Add from $20 to $40 to the Value of a Used Car!

WHITE REFRIGERATOR LACQUER

No. 2010

Created for refinishing electric refrigerators; covers well; will not turn yellow. Reduce 1½ gallons lacquer thinner to 1 gallon white before spraying.

1-GAL. CANS **$5.00 gal.** 1-QT. CANS **$1.40 qt.**

WHITE REFRIGERATOR PRIMER SURFACER

No. 2020

When the old finish has worn to bare metal, apply this product before refinishing. Reduce 1½ gallons Thinner to 1 gallon Primer Surfacer.

1-GAL. CANS **$3.25 gal.** 1-QT CANS **95¢ qt.**

PYROXYLIN PRIMER

No. 516

Cuts One Gallon Thinner to One of Primer

5-GAL. CANS **$2.15 gal.** 1-GAL. CANS **$2.25 gal.**

It adheres firmly to metal, forming a perfect bond for succeeding finishes. For best results, spray a thin mist coat of Primer, first making sure the surface is absolutely clean.

OIL BASE PRIMER

No. 2111

High-Grade, Overnight-Drying Metal Primer

1-GAL. CANS **$1.60 gal.** 1-QT. CANS **50¢ qt.**

Use it where the toughest and most elastic finish is wanted, particularly on stripped jobs. It will not lift when dry, even when Pyroxylin Surfacer or Enamel, reduced with Pyroxylin Thinner, is applied. Brushes or sprays!

Remember **BUDD PAYS THE FREIGHT ON ORDERS OF $15 OR MORE**

CHASSIS BLACK

No. 2011

Cuts Two to One

It is blacker and more durable than the ordinary chassis black. Particularly adapted for use on the chassis and undersides of fenders, No. 2011 resists to a marked degree the action of road chemicals. It covers in one coat and dries to a fine high gloss. Reduce with two gallons either gasoline or thinner to one gallon chassis black.

TOP DRESSING

BLACK

No. 2040

Water-proof! Non-streaking! Ready for use! This dressing prevents leaks, keeps tops looking like new. It is easily applied, and can be reduced with turpentine. Dries rapidly!

1-GAL. CANS **$1.45 gal.**

1-QT. CANS **45c qt.**

ENGINE GRAY ENAMEL

No. 2120

Gives automobile motors a new appearance—an important detail in a completely refinished job! This enamel dries quickly to a high gloss; will not chip, chalk, check or crack even under intense engine heat. Brushes or sprays.

1-GAL. CANS **$1.80 gal.**

1-QT. CANS **55c qt.**

DUST ELIMINATOR

No. 1515

Eliminates dust when sprayed on walls of spray booth or paint dept. Used in Budd plant in all synthetic spray booths. Removable with water. Better to use than water since it doesn't humidify the air. Ready to spray.

5-GAL. CANS **$1.25 gal.**

1-GAL. CANS **$1.35 gal.**

TOUCH-UP BLACK ENAMEL

No. 2030

No shop can consider itself well-equipped without a supply always available! Use it for touching up chipped and rusted spots, for fenders, bumpers, headlamps, tire carriers, bolts, etc. Dries dust-free in 1 to 1½ hours; to a hard, durable elastic finish in 4 to 5 hours.

1-GAL. CANS **$1.80 gal.**

1-QT. CANS **55c qt.**

EDW. G. BUDD MFG. CO.

TACK RAG

Chemically impregnated. To insure a 100% dust-free finish job, wipe off with tack rag before spraying.

25c each

LACQUER CLOTH

No. 2280

A double-purpose cloth for rubbing and polishing, demanded by refinishers everywhere!

The lintless, soft, absorbent weave insures the best in lacquer finishing. Does not scratch or mar; the rib weave prevents curling ends.

5-LB. OR 10-LB. ROLLS

55c per lb.

CHEESE CLOTH

No. 2290

2 and 3-Yard Lengths

Definitely a necessity in every refinishing shop . . . and decidedly an economy when purchased in these quantities. This surgical gauze approximates 23 yards to the pound.

5-LB. OR 10-LB. ROLLS **65c** per lb.

METAL POLISH

No. 3070

Unexcelled for chromium! Quickly and easily achieves a brilliant, lasting lustre. Removes tarnish and rain spots from nickel, chrome, brass, etc. Also recommended for home use on silver.

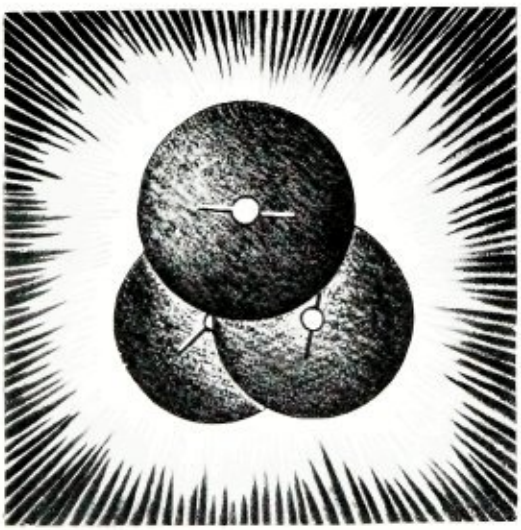
SANDPAPER · TAPE

EDW. G.

BUDD

MFG. CO.

SANDPAPER is the most common of the abrasives. It was also one of the first, and in one crude form or another has been widely used for centuries. Today, due to unceasing experiments tending toward its perfection, it has reached a high state of efficiency. As its uses became more complex and demanding, the variety of its facings increased. Besides sand, you will find emery, carborundum, garnet, quartz, corundum, pumice, crushed steel, glass and certain abrasive earths and stones widely used for sanding purposes. Budd has tested hundreds of commercial abrasives in its own laboratories. It gave them gruelling trials in its own shops to determine the best products for use on its own production lines. The ones presented here for your use all bear Budd's unqualified stamp of approval!



NEW PAINT REMOVING DISCS

Non-clogging, faster action for removing paint. The grit is applied in separated circles so that paint will not accumulate or clog on the disc. It is extremely fast in action and long wearing in use. A new product that you need to speed up work.

REFINISHING RECOMMENDATIONS

METAL CLEAN-UP (where portable sanding machine is available).

For rough work use Aloxite Combination Fibre Back Discs, grits 24 or 36 on portable sanding machine. For second operation, or finishing, use Aloxite Fibre Back Discs, grits 50 or 60. Follow the above operations with the use of Aloxite Brand K-5 Flexbac Paper 120-C or 150-C available in 9x11" sheets for hand sanding.

METAL CLEAN-UP (where portable sanding machine is not available.

Use either Carborundum Brand Flexbac Paper 100-C or 80-E or Aloxite Brand K-5 Flexbac Paper 100-C or 80-D. Where finer surfaces are desired, use 120-C or 150-C. These papers may be used dry or with gasoline.

SANDING SURFACER OR UNDERCOATS

Use Carborundum Brand Waterproof Paper 220-C or 240-C. Use 280-A for finer finish. Rub with water on both lacquer and oil surfaces.

SANDING LACQUER BETWEEN COATS

Use Carborundum Brand Waterproof Paper 280-A or 320-A with water or gasoline.

FINAL LACQUER COAT

Use Carborundum Brand Waterproof Paper 360-A or 400-A, depending upon finish desired. Use with water or gasoline.

CARBORUNDUM "FLEXBAC" PAPER

For dry sanding and general clean-up. It may be used dry or with gasoline.

In 9" x 12" Sheets

A paper ideally suited for dry or gas sanding painting materials.

Sanding Recommendations

OLD FINISHES:

For preparing old surfaces on the body or chassis where new finish is applied without stripping to the metal:

No. 80-D Adalox Paper for coarse finish
No. 100-C Durite Paper for medium finish
No. 150-C Durite Paper for fine finish
Use Dry or with Gasoline

For Change Color Jobs or where New Finish is applied on top of old, but without use of surfacer:

No. 240-A **Speed-wet** Waterproof Paper for Coarse finish
No. 280-A **Speed-wet** Waterproof Paper for Medium finish
No. 320-A **Speed-wet** Waterproof Paper for Fine finish
Use with Water or Gasoline

METAL:

The metal can be conditioned by hand or machine sanding. Papers or cloths used for hand sanding should be used dry or with gasoline. Machine Sanding should be done dry.

Type of Surface	9x11 Sheets Paper	Metalite Discs F. C.	Metalite Bands Cloth
Coarse	80-D Adalox	24	24
Medium	100-C Durite	36	36
Fine	150-C Durite	50	60

UNDERCOATS:

We recommend that surfacer be sanded with water and **Speed-wet** for best results. We show both Light (A) and Heavy (C) weight backings, but suggest the use of "A" due to its supreme flexibility.

Water Sanding	Dry Sanding
280-A **Speed-wet** or 240-A **Speed-wet** followed by 320-A **Speed-wet**	220-A Durite Paper followed by 280-A Durite Paper

LACQUER:

No. 280-A or 320-A **Speed-wet** with water or gasoline for sanding between lacquer coats.

No. 320-A or 400-A **Speed-wet** used with water or gasoline for sanding on final lacquer coats to be followed with thinner coat or polish.

No. 1980-C	2"	1.89	1.77

MASKING COMPOUND

(Liquid Spray Shield—No. 1990)

A shielding material that can easily be applied with a spray gun . . . or when working to a sharp edge, with a brush. Water washes it off easily after use. For keeping the shop clean and reducing fire hazard, spray it on the inside of the spray booth where it accumulates dust, etc.; then wash off shield and accumulation with water.

BUDD DOOR REPAIR PANELS

Budd's body craftsmen and engineers conceived the tremendous possibilities of an easy-to-install, economical-to-use panel that would completely and effectively replace the damaged one . . .at a considerable saving both of time and money, and result in a perfect repair job. Made of hammered steel, cut in standard sizes, with specialized units for certain models . . . these panels come to you ready to install.

EASY INSTALLATION

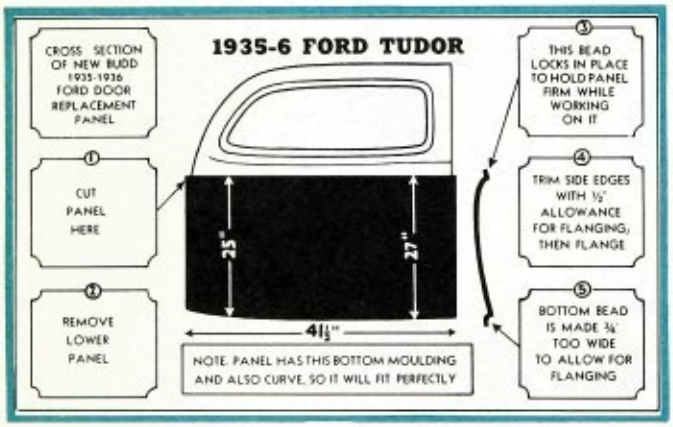
No. 1— To remove damaged panel, drill spot welds with ¼" drill, then insert cold chisel between flange and damaged panel and pry off. Damaged panel is then cut off beneath moulding head with tinners snips, leaving exposed frame.

No. 2—Trim Budd Door Repair Panel, allowing from ½" to ¾" for flanging on each side of the door. Slip trimmed panel under moulding bead, hold panel in place with C-clamps. Place wooden block under clamp to prevent damage to panel. Flange panel. After flanging, weld in several spots along back of flange.

No. 3—Solder panel along moulding, and metal finish.

Note:—Some repairmen hold the panel in place by using several countersunk head metal drive screws in moulding. They can be buffed down or filed down flush with moulding, then soldered for smooth finish.

Five Easy Steps to Install 1935-6 Ford and 1937 Chevrolet Door Panels



1935-36 FORD

PART NO.	DESCRIPTION	LOTS OF SIX EACH	SINGLE PANELS EACH
F-356-RF	1935-1936 Ford Sedan, Coupe and Coach—Right Front Door	$2.50	$2.75
F-356-LF	1935-1936 Ford Sedan, Coupe and Coach—Left Front Door	2.50	2.75
F-356-R	1935-1936 Ford Sedan Rear Doors—Both Right and Left	1.95	2.20

Note:—Supplied on the front doors wide enough so that they will fit the coach and may be cut down to fit the sedan and coupe.
Front doors come in right and left, so specify when ordering. Rear doors are interchangeable on right and left.

1937 CHEVROLET

PART NO.	DESCRIPTION	LOTS OF SIX EACH	SINGLE PANELS EACH
C-37-RF	1937 Chevrolet Sedan, Coupe and Coach—Right Front Door	$2.98	$3.25

BODY AND FENDER TOOLS and EQUIPMENT

EDW. G.
BUDD
MFG. CO.

Increase Your Profits with . . . MODERN EQUIPMENT

Are you using antiquated equipment? Are you "trying to get by" with out-moded tools? Have you ever wondered why a competitor of yours could turn out a better job, in faster time, and at less cost than you could? These are important questions every auto-body repair shop man, every re-finisher, every service manager should be able to answer satisfactorily. The automobile of today is a vastly superior product to the car of three, four or five years ago. Tools and equipment have advanced just as rapidly. Many of the products shown in the pages following were not even dreamed of five years ago. Today, they are indispensable! We call your attention to a few of these below. More elaborate details will be found on succeeding pages.

The American Giant-Lift

HYDRAU-KIT

A complete, portable, 2-ton hydraulic power unit specially developed for all body and fender work—for straightening, pressing, bending, pulling and pushing . . . priced so low even the smallest shop can afford to own one. SEE PAGE 48.

The Precision-Built Seiden

PNEUMATIC HAMMER

Makes fender and panel repairing faster and easier! Increases the speed and quality of your work! New high power! New low pressure! Operates efficiently from any standard air compressor. SEE PAGE 52.

Binks New Thor Model 7

SPRAY GUN

Sprays both lacquers and synthetics without changing the nozzle. A new development . . . the most outstanding spray gun on the market for economy, performance and the perfection of its mechanism! It is an essential piece of equipment for the modern paint shop. SEE PAGE 50.

Van Dorn Portable

ELECTRIC TOOLS

A complete line of sanding and polishing tools offering units in the power and price to meet the individual requirements of your body shop. They're specially designed to fill all the needs of today, at a great economy of operation. SEE PAGE 54.

WELDING EQUIPMENT AND BRUSHES

EDW. G. BUDD MFG. CO.

"ALL FILES MAY LOOK ALIKE"

. . . But Looks Aren't All!

Every mechanical device was created to do a certain job. The purpose of the file is to destroy. Of two files, that one which, under identical circumstances and with the same amount of man-power behind it, destroys most in the same time is the most efficient.

The files you buy from Budd may not LOOK any different from those you may be using now. But Budd files ARE different, decidedly so, and you can easily prove it to your own satisfaction!

Take 50 or 100 strokes with each side of a new file of your favorite make. Collect the filings.

Repeat with a Budd file. Weigh the filings.

In all probability, the Budd filings will be from 40 to 100 per cen heavier!

Not only do Budd files get the same results in half the time, bu they last TWICE as long! Not only do Budd files "carry their weight" in actual savings—they save time which translated into the dollars and cents you spend for labor will amount to many times over the actual cost of your Budd files!

GENUINE VIXEN BODY FILES

FLEXIBLE STANDARD CUT FILE

No. 421

Besides their general use throughout the automotive industry, these Vixen Files are particularly adaptable to all sheet metal work. Have teeth on both sides, and should be attached when in use to a holder. Can be bent to any reasonable curve.

Vixen Flexible Standard Cut File.

Size	Net Price

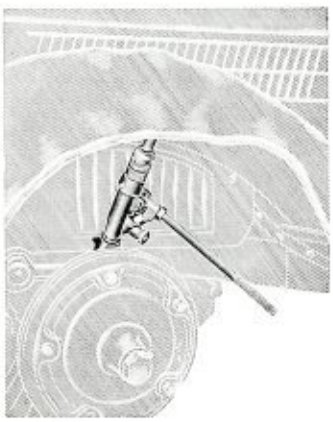
A HYDRAULIC JACK

Complete Adjustable Hydraulic Power Unit and Appliances Packed in Convenient Steel Kit

For all body and fender work—straightening, pressing, bending, pulling and pushing! This American Giant-Lift Hydrau-Kit introduces something new . . . a portable, complete, hydraulic power unit so reasonably priced even the smallest autobody repair shop can afford one! The various attachments, plus the 4000-pound capacity power unit, will enable you to do MORE and BETTER work. The small investment will pay you big dividends and add greatly to the prestige of your shop!

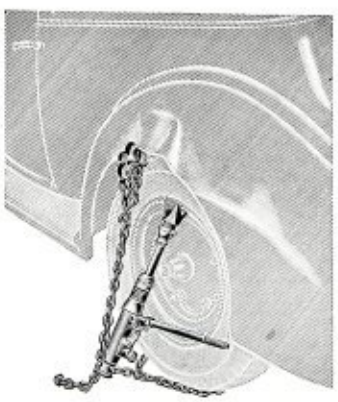


For straightening damaged fenders, any angle of thrust can be obtained by placing base of unit against frame of car, brake band, or on floor—using proper pipe connections.

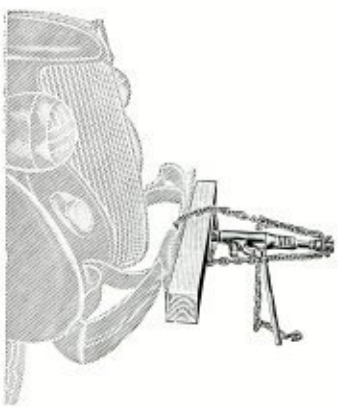
Showing Hydrau-Kit in use. Pushing a sprung door frame back into its original shape.

Small and compact, yet powerful, the Hydrau-Kit Power Unit easily fits under dash to straighten damaged cowl. Note use of the knuckle joint.

Showing use of ram hook, chains and ordinary wood block to reshape corner of body.



Showing chain hook-up and use of Fender Clamp to pull damaged fender downward and outward.



Showing use of Hydrau-Kit Power Unit in straightening bumper bar.

New High Power!

New Low Pressure!

SEIDEN PNEUMATIC HAMMER

Eliminates the long tedious jobs of panel and fender repairing; greatly increases the speed and quality of the work! Precision built! The piston is its only working part, which acts as its own valve (sleeve action), and is equipped with a piston ring which insures its durability and long life. This hammer is designed to be used with yoke attachments or ordinary dolly blocks, and is highly efficient for both body and fender repairing in whichever manner it is used, eliminating all of the filing on most fender repairs. Operates from any standard air compressor.

COMPLETE

with Yoke Attachments and Anvils illustrated below.. **$87.50**

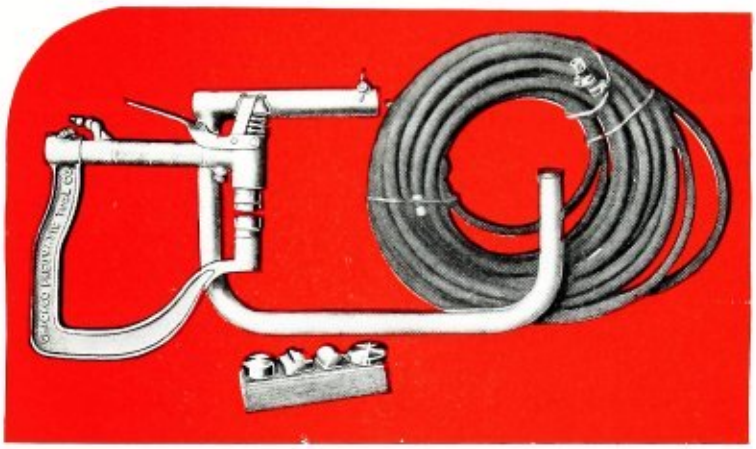
THE C-P FENDER IRON

FENDER AND SHEET METAL REPAIRS IN HALF THE USUAL TIME

Every modern and progressive body repair shop will welcome the introduction of this new and improved pneumatically operated finishing tool. Manual bumping is reduced to a minimum with its use. The all-steel construction insures its long life and low maintenance. It is light, finely balanced and compactly designed for easy handling in difficult spots. The quick interchange of yokes permits adaptability to varying sizes and shapes of fenders. It is air-powered, hence fast and efficient on even the heaviest gauge sheet metal. Because the blow is not struck directly on the fender metal but is transmitted through a die, it prevents scratching of the metal. Its rounded corners eliminate scratching and marring of surrounding finish. It bumps out turret tops as easily as fenders. It saves time, increases profits, adds greatly to the prestige of your shop.



Priced Complete

$95.00

PNEU-MATIC HAMMERS

EQUIPMENT INCLUDES

1 Fender Iron with built-in pressure regulator and throttle

1 Yoke—10″ reach x 8″ gap

1 Yoke—17½″ reach x 11½″ gap

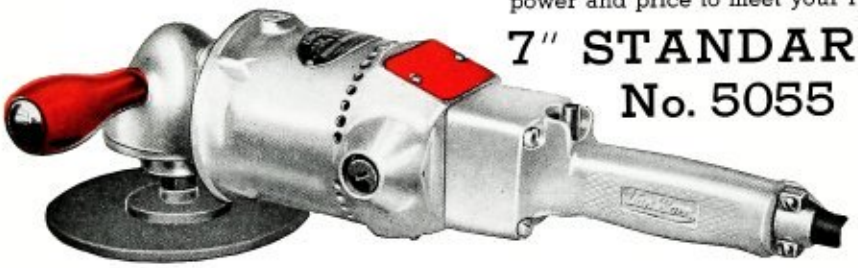
"Van Dorn" PORTABLE ELECTRIC TOOLS

Van Dorn Sanders greatly speed up sanding welds, smoothing fenders, preparing surfaces for painting, removing rust and for general metal finishing and sanding. In the complete line listed below you will find a tool with the power and price to meet your requirements.

7" STANDARD SANDER No. 5055

$53.00

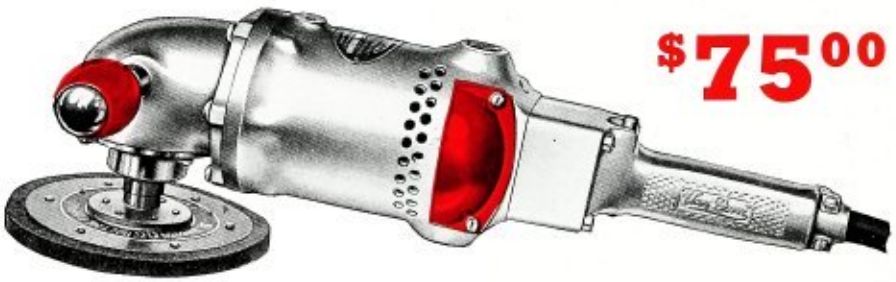


The most popular Sander for general shop use, correctly powered for general maintenance surfacing, cleaning, wire brushing and rubbing. Equipped with moulded rubber pad which adapts the flexible disc to either flat or curved surfaces. Ample ventilating slots, completely enclosed switch, adjustable side handle for use on either side of tool. Equipped with three-conductor cable and plug; three sanding discs, one medium, one coarse and one fine.

Net weight..... 7¾ lbs. No-Load Speed..... 3200 R.P.M.

7" HEAVY DUTY SANDER No. 5060

$75.00



Designed for the shop doing sanding and body work on a large scale production basis, this unit is packed with extra power for continuous operation. The 7" Heavy Duty Sander will turn out a tremendous amount of metal surfacing work over a long period. Equipped with 3-conductor cable and plug; detachable side handle; 7" flexible felt and metal pad; twelve 7" sanding discs (4 coarse, 4 medium, 4 fine). No-Load Speed..... 4200 R.P.M.

9" STANDARD SANDER—Designed for automotive and industrial shops requiring a slower speed unit for larger working areas on intermittent service. No. 5070.

Net weight..... 15¼ lbs. No-Load Speed..2700 R.P.M. Price..... **$78.00**

7" STANDARD POLISHER No. 5065

$52.00

It's easy to turn out a first class polishing job with the Van Dorn Polisher in a fraction of the time necessary by hand. The Electric Polisher quickly removes that road film that washing will not and restores the original color and lustre. It not only saves time, but does better work and that means more and better satisfied customers. NONE BETTER FOR RUBBING OUT REPAINT JOBS.

Net weight..... 9½ lbs.
No-Load Speed ..... 1200 R.P.M.
